Cybersecurity Analyst

Description

We are looking for Cybersecurity Analysts who can expand our cybersecurity datasets for the periodic improvements of our Machine Learning models.

Responsibilities

1. Monitor the quality of results of the automated system in the detection of attacks, intrusions, and unusual, unauthorized or illegal activities.
2. Build and maintain scripts that collect cyber threats data from external sources as well as from the in-house analytics engine, data quality inspection, and dataset creation for ML with manual annotation.
3. Assist Data Scientists & Machine Learning Engineers in developing systems that automate risk assessment/mitigation workflows.
4. Keep up to date with the latest security and technology developments.
5. Research and evaluate emerging cybersecurity threats and ways to manage them.

Skills

Must-have skills

1. Attention to details and a quality first mindset.
2. Knowledge of current hacking techniques, vulnerabilities, and security analysis techniques.
3. Basic programming experience, and the ability to automate tasks.
4. Manual code review or source code analysis experience.

Note: Since we are a startup, you can expect more responsibilities.

Job Benefits

- A competitive salary.
- Health Insurance.
- An awesome team that will challenge and respect you.
- Lunch, Unlimited snacks and drinks.
- Top notch office in the heart of Bangalore City.
