Front-End Engineer

Description

A Front-End Engineer is responsible for developing interactive web-based mobile, and/or desktop applications using Industry best practices to deliver high value and quality to clients.

The candidate would work closely with Visual Designers and Application Developers to build highly-efficient, user-friendly, interfaces.

Skills

Must-have skills

1. Good Understanding of React.js / Vue.js, its core principles lifecycle methods, virtual DOM etc. and at least 6 – 12 months hands-on experience with the same.
2. Excellent knowledge of hand-coded HTML5, CSS3, JavaScript.
3. Hands-on experience working with Object Oriented JavaScript (OOJS), JavaScript libraries and their practical uses in building complex interactive experiences.
4. Knowledge of common JavaScript design patterns.
5. Hands-on experience with ECMAScript 2015+ and should be up-to-date with new specifications (different stages). Also, using transpilers like Babel to use features from all stages.
6. Understanding of stateful (container) vs stateless (presentational) components and how to break down the application into components.
7. Understanding of different CSS architectures that go hand-in-hand with React.js/ Vue.js application development. Pros and cons of component-level CSS vs global and where to apply each.
8. Thorough understanding of Webpack bundler (version 2+). Experience with configuring Webpack from scratch is a plus.
9. Develop and build, sleek and fast loading modern UI applications.
10. Turn mock-ups and designs into the full solution.
11. Develop and optimize front-end UI functionality to ensure web applications are rendered consistently in the cross-browser environment.

Experience

2-5 years experience (Minimum 1yr in React.js/ Vue.js)
